Effect of titanium active site location on activity of phase boundary catalyst particles for alkene epoxidation with aqueous hydrogen peroxide

SCIENCE AND TECHNOLOGY IN CATALYSIS 2002
145: 251-254 2003

These documents in the database cite the above record:

1. Takahara YK, Ikeda S, Tachi K, et al. Porous polystyrene microspheres having dimpled surface structures prepared within micellar assemblies of amphiphilic silica particles in water
CHEMICAL COMMUNICATIONS (33): 4205-4207 2005
Times Cited: 1

JOURNAL OF THE AMERICAN CHEMICAL SOCIETY 127 (17): 6271-6275 MAY 4 2005
Times Cited: 3

3. Nur H, Ikeda S, Ohtani B Phase-boundary catalysts for acid-catalyzed reactions: The role of bimodal amphiphilic structure and location of active sites
Times Cited: 0

REACTION KINETICS AND CATALYSIS LETTERS 82 (2): 255-261 2004
Times Cited: 0
Asymmetrically modified titanium(IV) oxide particles having both hydrophobic and hydrophilic parts of their surfaces for liquid-liquid dual-phase photocatalytic reactions
Times Cited: 8
